

> SMLL CONTROL ROOMS

The SMLL Testbed offers clients access to two control rooms across its testbed to allow the effective monitoring and coordination and centralised control of any testing taking place on the road.

It provides access to all video feeds, GPS tracking of vehicles on the testbed and access to TRL’s iMAAP software to assist with trial and incident management.

These are all controlled via the intelligent video controller allowing a fully customised set of screens appropriate to the type of trial being conducted.

All feeds from both testbed areas can be accessed from either data centre offering a resilient solution to time critical testing and validation.

Control Room Woolwich HQ

Overview

The SMLL Woolwich HQ control room has state of the art facilities to effectively control and manage on street testing. It has desk space for two operators to use it simultaneously and can be closed off from the rest of the office if required by the client.

Key Facts

- 3x2—46” video wall
- Six 22” operator displays
- Cisco Videoconferencing Facilities
- Audio Visual System Link

SMLL CONTROL ROOMS

Control Room Plexal

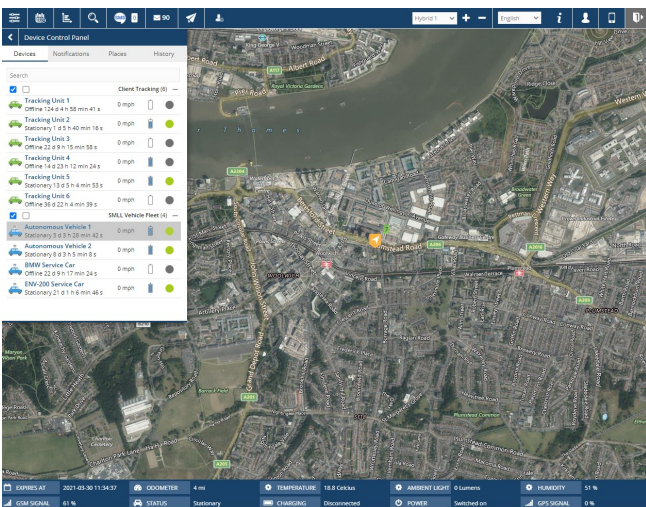

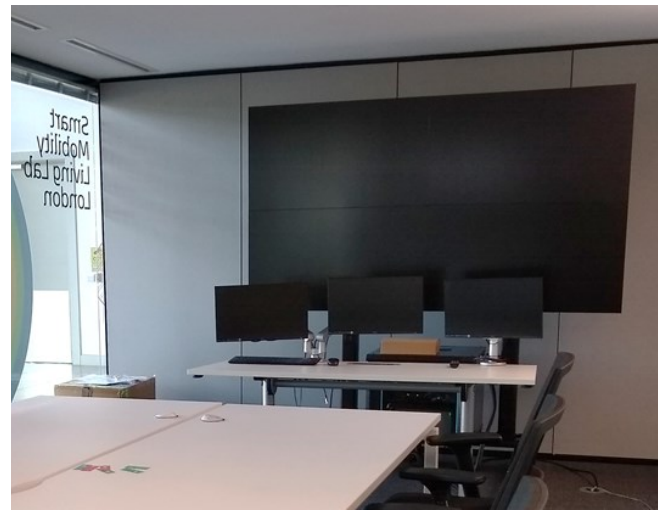

Overview

The SMLL Plexal Office control room has state of the art facilities to effectively control and manage on street testing along with a large desk or meeting space. Feeds from both the QEOP and Greenwich testbed routes can be accessed from this location.

This is ideal for clients would like to carry out testing in a fully private environment. It has desk space for an operator to run trials effectively along with a large meeting table that can comfortably seat six people to support trial activities and coordinate operations.

Key Facts

- 2x2—46” video wall
- Three 22” operator displays
- One operator desk
- Large multifunctional table—up to six workstation desks spaces or twelve for a meeting
